COR100 Snap! Programming

Practice - Sequences

1. Define a new project "Sequence" and build this script in your Snap! dashboard. You can pick a non-standard sprite if you like.

```
go to x: 0 y: 0
say Hello! for 2 secs
say How-are-you-guys?! for 2 secs
think Hmm...what-should-I-show-them? for 2 secs
say See, I-can-move! for 2 secs
move 100 steps
say And-now-turn... for 2 secs
repeat 12
turn 30 degrees
wait 0.1 secs
say I-can-change-color, too! for 2 secs
change color effect by 25
say Now-I-am-going-to-hide... for 2 secs
hide
```

2. When you try to run the script a second time, nothing happens. What could you do to re-run it properly?
